AB SU 1729436 A1 UPAB: 20050507

The ornament comprises a hollow sphere (1) housing absorbant (2) impregnated with perfume and having a normally closed hole (4) for refilling, supplementing a dispenser (7). The single- or multi-section product can be filled with a series of perfumes. Sealing plugs (5,6) and hole (3) with partition (9) control the rate of evolution of the perfuming effect.

USE/ADVANTAGE - Allows regulation of perfume escape rate. For jewellery, haberdashery items, and in medicine. Bul. 16/30.4.92
